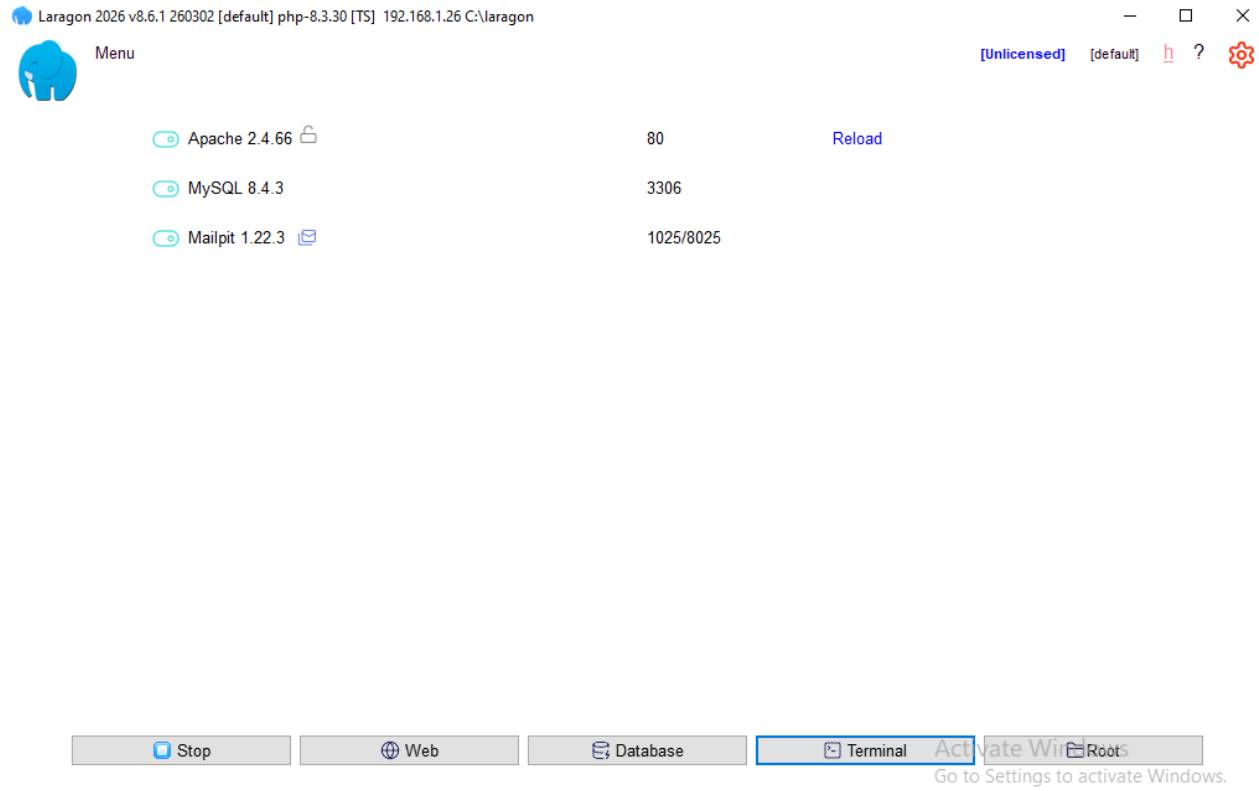
AKTIVITAS 1

1. Instal XAMPP terbaru, pastikan PHP 8.2+ tersedia (cek: php --version di terminal)

Pakai laragon



```
C:\Users\ASUS>php --version
PHP 8.3.30 (cli) (built: Jan 13 2026 22:50:40) (ZTS Visual C++ 2019 x64)
Copyright (c) The PHP Group
Zend Engine v4.3.30, Copyright (c) Zend Technologies

C:\Users\ASUS>
```

2. Instal Composer dari getcomposer.org, verifikasi dengan: composer --version

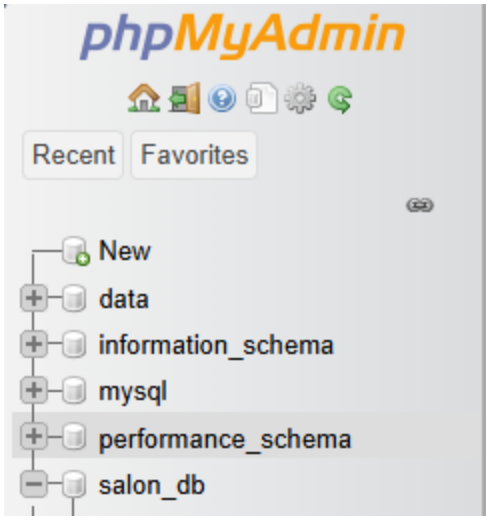
```
C:\Users\ASUS>composer --version
Composer version 2.5.1 2022-12-22 15:33:54

C:\Users\ASUS>
```

3. Buat proyek Laravel baru: composer create-project laravel/laravel siak-app (GoldenGlow)

```
C:\Users\ASUS>composer create-project laravel/laravel GoldenGlow
```

4. Buat database baru 'siak_db' di phpMyAdmin (salon_db)



5. Konfigurasi file .env: isi DB_DATABASE, DB_USERNAME, DB_PASSWORD sesuai lokal

```
DB_CONNECTION=mysql
DB_HOST=127.0.0.1
DB_PORT=3306
DB_DATABASE=salon_db
DB_USERNAME=root
DB_PASSWORD=
```

6. Jalankan: php artisan key:generate

```
PS C:\laragon\www\GoldenGlow> php artisan key:generate

  INFO  Application key set successfully.

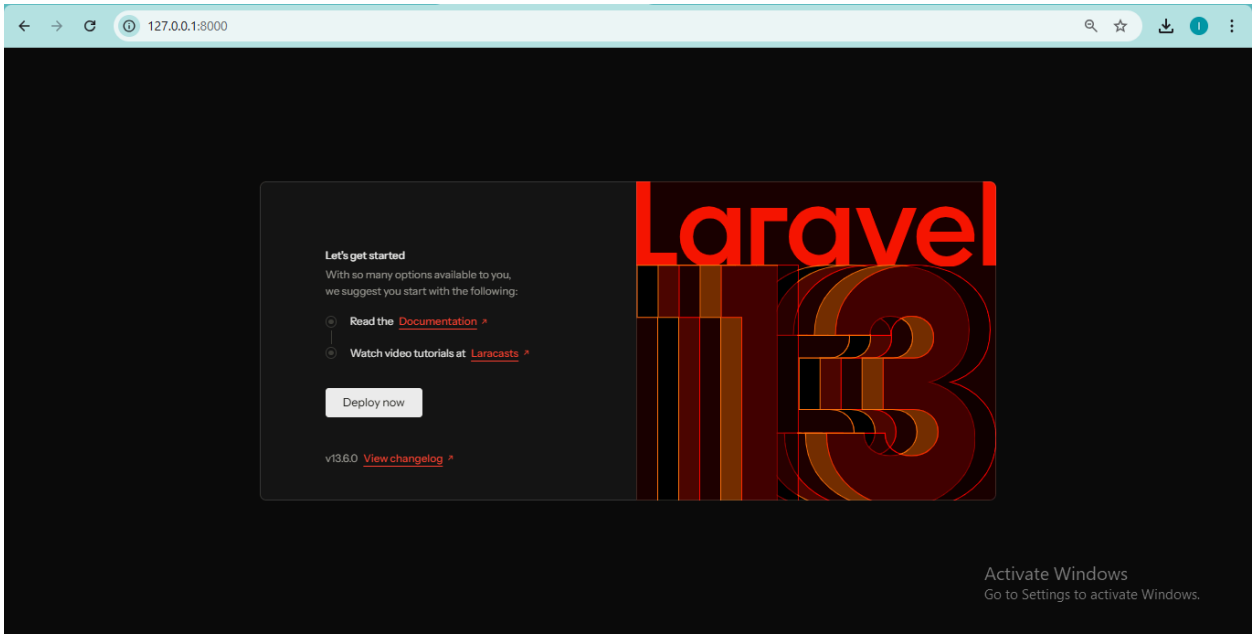
PS C:\laragon\www\GoldenGlow>
```

7. Jalankan server: php artisan serve — buka http://127.0.0.1:8000 di browser

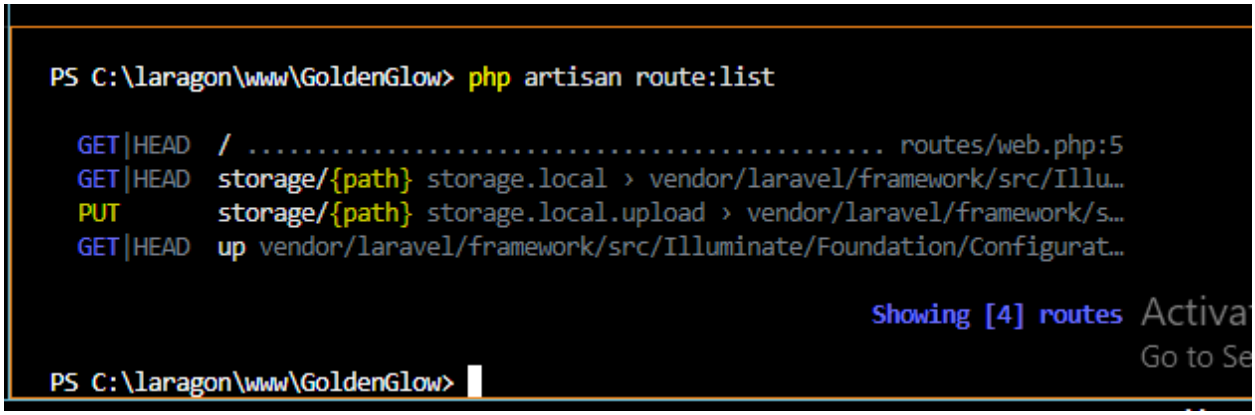
```
PS C:\laragon\www\GoldenGlow> php artisan serve

  INFO  Server running on [http://127.0.0.1:8000].

  Press Ctrl+C to stop the server
```



8. Eksplorasi struktur folder, buka setiap folder dan pahami fungsinya
    - app, isinya kode utama aplikasi seperti controller dan model. Di sinilah logika program dibuat.
    - bootstrap, digunakan untuk proses awal saat Laravel dijalankan.
    - config, berisi file konfigurasi aplikasi (database, mail, dll).
    - database, berisi semua yang berkaitan dengan database: migrations (struktur tabel), seeders (data awal)
    - public, folder yang bisa diakses langsung oleh browser misalnya css, js, img
    - resources, isi tampilan aplikasi (view), biasanya dalam bentuk file Blade
    - routes, mendefinisikan URL dan mengarahkannya ke controller atau view.
    - storage, untuk menyimpan file sementara seperti cache dan log.
    - vendor, library bawaan Laravel dari Composer
    - env, konfigurasi utama seperti koneksi database, nama aplikasi, dll.
9. Jalankan php artisan route:list dan catat route apa saja yang sudah terdaftar



AKTIVITAS 2

1. Buat Controller DashboardController: php artisan make:controller DashboardController

```
PS C:\laragon\www\GoldenGlow> php artisan make:controller DashboardController

  INFO  Controller [C:\laragon\www\GoldenGlow\app\Http\Controllers\DashboardController.php] created
successfully.

PS C:\laragon\www\GoldenGlow>
```

2. Tambahkan method index() yang mengembalikan view('dashboard') di DashboardController

web.php | DashboardController.php | .env

app > Http > Controllers > DashboardController.php > DashboardController > index

```php
<?php

namespace App\Http\Controllers;

use Illuminate\Http\Request;

class DashboardController extends Controller
{
    //
    public function index()
    {
        return view('dashboard');
    }
}

```

3. Daftarkan route di routes/web.php: Route::get('/dashboard', [DashboardController::class, 'index'])->name('dashboard')

```php
routes > web.php
<?php

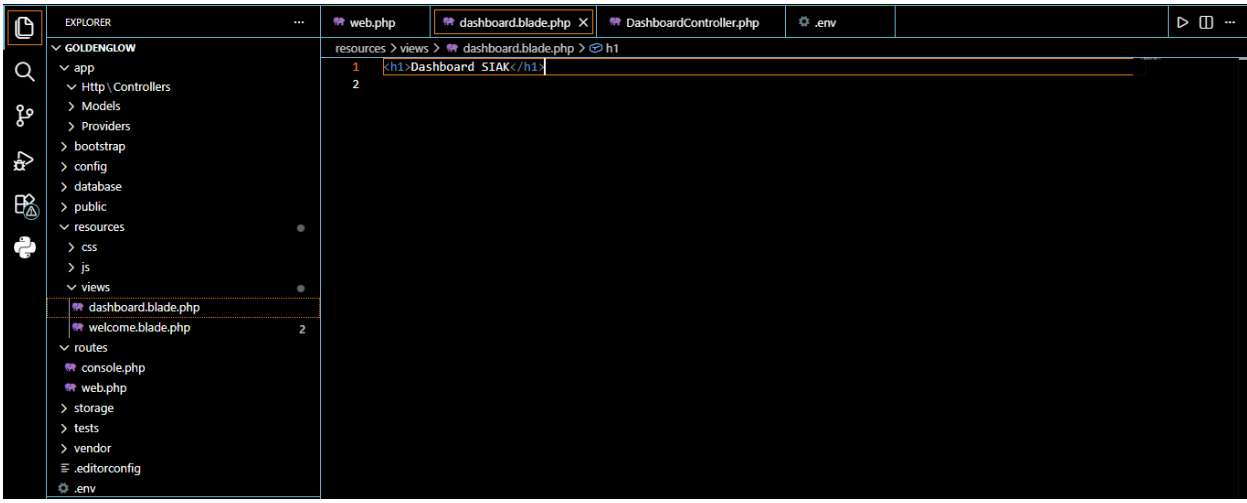
use Illuminate\Support\Facades\Route;
use App\Http\Controllers\DashboardController;

Route::get('/', function () {
    return view('welcome');
});

Route::get('/dashboard', [DashboardController::class, 'index'])->name('dashboard');

```

4. Buat file view sementara resources/views/dashboard.blade.php berisi '<h1>Dashboard SIAK</h1>'

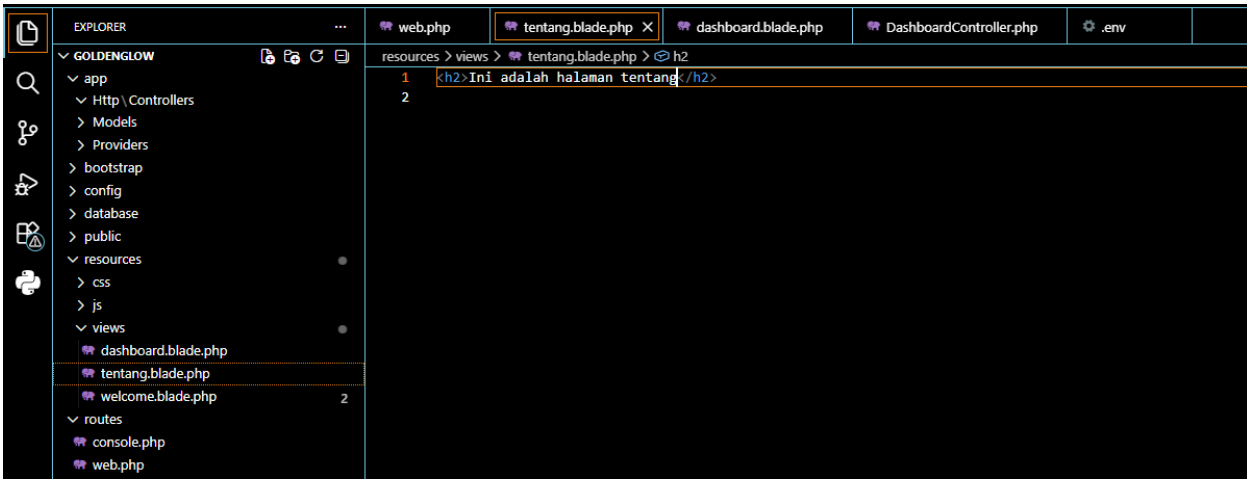


5. Akses http://127.0.0.1:8000/dashboard di browser — pastikan tampil

Activate Windows
Go to Settings to activate Windows.

6. Buat route /tentang dengan Route::view('/tentang', 'tentang') dan buat view-nya

```
11  Route::view('/tentang', 'tentang');
12
```



7. Jalankan php artisan route:list — amati semua route yang terdaftar

```
PS C:\laragon\www\GoldenGlow> php artisan route:list

  GET|HEAD  / ............................................ routes/web.php:6
  GET|HEAD  dashboard ................. dashboard › DashboardController@index
  GET|HEAD  storage/{path} storage.local › vendor/laravel/framework/src/Illum…
  PUT       storage/{path} storage.local.upload › vendor/laravel/framework/sr…
  GET|HEAD  tentang ......................................................
  GET|HEAD  up vendor/laravel/framework/src/Illuminate/Foundation/Configurati…

                                                          Showing [6] routes
                                                          Activate Windows
PS C:\laragon\www\GoldenGlow>                             Go to Settings to activate
```

8. Coba buat Route::get('/hitung/{a}/{b}', fn($a, $b) => $a + $b) dan akses /hitung/10/25

15
